

Whole home lighting control made simple

prowired
Electrical Contractors Ltd

Prowired brings you RA2 Select from LUTRON

Personalised smart lighting

At Prowired, we stay up-to-date with the latest innovations and developments in home lighting systems. Now we can bring you personalised smart lighting and shade control for your home with RA2 Select from Lutron. RA2 Select gives you added convenience, more comfort and enhanced peace of mind. You can stay in control of your home lighting, even when you're out.

Lighting control when you want it, wherever you are

RA2 Select lets you control your lights and shades from your smartphone or tablet, from anywhere in the world using the free Lutron App. You can also use the versatile Pico remote (left) for control throughout your home. The Pico is available as a keypad, for scene control, or as a remote, for individual light and shade control. The main repeater supports up to 100 devices.

Simple setup

Easy system setup through the Lutron App automatically configures light and shade levels for typical activities. The pre-engraved Pico scene keypad guarantees every scene keypad in the home has an intuitive scene icon, for those pre-set light and shade levels.

Third party integration

RA2 Select also works with smart home solutions from other best-in-class brands. Expand your system to add even more convenience to your day-to-day life:
