Quotations

We all appreciate everything costs money to get the correct works completely safely. Before any works are started you will receive a competitive quotation and only when the quotation has been agreed and accepted the works will be completed with no hidden costs.

Site Accommodation setup

When starting a new site, temporary electrical installations are a must to get the site team off to a good productive start. We can provide all types of installations from a fuse board to get an electric meter connected to a full 3 phase installation which could accommodate silos, pumps, site offices and lighting around site.

PAT Testing

It seems the demand for PAT testing is increasing and be more apparent than ever now. Our dedicated engineer will test numerous items in one visit. Once completed we will issue you with a PDF copy of all your items tested so you have the appropriate information to pass on to your health and safety team.

Electrical Installations

We undertake all electrical installations from a simple fuse board change to large factory installation. With the knowledge we have gain through the years and a experienced and hardworking team we feel we can offer a high standard of workmanship and a overall professional service.

TV, Door Entry, Fire Alarm, A.O.V and Data

We also offer variations of other services. All of these services are undertaken with specifications in mind to meet all the client's needs. The dedicated team we have working on these are experienced enough to overcome any issues.

Health and Safety/ CSCS Cards

We undertake health and safety in the work place very seriously. All our RAMS are in place. Monthly Audits are carried out including ladder logs, Pure sheets, PAT Testing and HAVS sheets. All staff have correct and up to date CSCS cards. Our health and safety consultant will update us on any changes we will need to make to our documents.

Testing and Commissioning

This is something we are very passionate about. Once works are completed we will conduct a full test of the electrical installation including ventilation testing, smoke alarm testing and BT testing. All of these we be given to you in a PDF handover pack, so you have all the relevant information in one place.

Customer Care

We have a dedicated engineer that conducts remedials for us. Appointments are booked through our office. We feel by doing this he is aware of any material issues that maybe faulty and can resolve all remedial issues. We have a system in place to log all remedials and will notify you once completed.
